INDUSTRY DATA GROUP

DATA CATALOGUE

The industry data group's role is to build and sustain high quality information services that support the australian dairy industry.

Team members

Chris Anttila
Industry Data Group Team Leader

P 03 9694 3757   **M** 0431 582 645

E Chris.Anttila@dairyaustralia.com.au

Oversees Industry Data collections, data sharing programs and dashboards and reports.
Manage the database platform and provide technical advice for projects requiring data management.

Jeff Allen
BI/Database Developer

P 03 9694 3776

E Jeff.Allen@dairyaustralia.com.au

Provides data modelling and design, reporting and interactive solutions for working with DA datasets. Administration of the data and reporting platform.

Vanessa Fischer
Industry Data Coordinator

P 03 9694 3795

E Vanessa.Fischer@dairyaustralia.com.au

Manages the currency of databases for a range of collections including milk production, manufactured production, ABS trade data, production inputs update and farmgate milk prices.

Samantha Esposito
Industry Data Coordinator

P 03 9694 3843

E Samantha.Esposito@dairyaustralia.com.au

Manages the currency of databases for a range of collections including domestic sales, Who Makes What and international imports and exports. Produces the Australian Dairy Industry In Focus.

Data Catalogue

Most of the reports and data listed below are available free of charge to all Australian dairy industry stakeholders. Some reports or additional levels of detail are available only to dairy processors who participate in Dairy Australia data sharing programs. These comprehensive sources of dairy production and sales information constitute a service unique to Dairy Australia, established through close cooperation with the industry. Dairy processors who are interested in benefiting from data sharing with Dairy Australia should contact the Industry Data Group for more information.

Sale information

Domestic sales

Domestic, Sales, Monthly, Categorised, Detail: High

Data
The Dairy Australia Domestic Sales database includes monthly wholesale data for important dairy categories such as milk, butter, cream, cheese and yoghurt. The data contains important dimensions such as sales channel, segment, pack type/size and state.

Source
The Domestic Sales database collects and pools data from participating dairy manufacturers in Australia.

Access
The Dairy Australia Drinking Milk Sales Report

dairyaustralia.com.au/industry-statistics/industry-reports/ production-and-sales-statistics

Production information

Milk production

Domestic, Production, Monthly, Detail: Medium

Data
The Dairy Australia Milk Production database includes monthly volume data for protein, fat and litres of raw milk picked up from suppliers. The data contains pickup states and regions.

Source
The Milk Production database collects data from participating milk processors in Australia, Levies Revenue Services and the State Dairy Authorities.

Access
The Dairy Australia National, Victoria and New South Wales Milk Production Reports

dairyaustralia.com.au/industry-statistics/industry-reports/ production-and-sales-statistics

Dairy manufacturing production

Domestic, Production, Monthly, Categorised, Detail: Medium

Data
The Dairy Australia manufactured production database includes monthly production data for important dairy categories such as butter, butteroil, SMP, BMP, cheese, WMP and whey powder from 2000 onwards. The data can be displayed by production state.

Source
The manufactured production database collects and pool data from participating dairy manufacturers in Australia.

Access
The Dairy Australia Manufactured Production Summary Report, Cheese Production Report

dairyaustralia.com.au/resource-repository/2020/09/25/ manufactured-dairy-products-production-report

International trade/Tariff information

Australian dairy imports and exports

International, Trade, Monthly, Categorised, Detail: Medium

Data
The Dairy Australia imports/exports database includes monthly imports/exports volumes and values for nineteen different dairy product categories including but not limited to butter, cheese, milk, SMP, WMP and yoghurt. The time series starts at 1990 and is ongoing.

Source
The Australian Dairy Trade database uses subscription data from the Australian Bureau of Statistics.

Access
Dairy Australia provides a monthly dairy exports report

dairyaustralia.com.au/industry-statistics/industry-reports/latest-export-statistics

Dairy Australia does not provide a standardised report for dairy imports, but customised reports can be made available on request. Please contact the Industry Data Group for more information.

International dairy trade

International, Trade, Monthly, Categorised, Detail: Medium

Data
The Dairy Australia international trade database includes monthly imports/exports data covering both volume and value for nineteen different dairy product categories and 30 different countries from the year 2000 onwards. The dataset includes important dimensions such as geographic zone and country of export/import.

Source
The International Dairy Trade database uses subscription data from Trade Data Monitor.

Access
Dairy Australia does not provide a standardised report for international dairy trade, but customised reports can be made available on request. Please contact the Industry Data Group for more information.

Dairy tariffs, quotas and safeguards

International, Reference, Annual, Detail: Medium

Data
The Export Market Dairy Tariffs database includes an annual snapshot of quota, safeguard and tariff rate information for 22 of the most relevant overseas export destinations for the Australian dairy industry.

Source
The Export Market Dairy Tariffs database includes data from websites from various customs and other government organisations around the world.

Access
The Export Market Dairy Tariffs Guide, Individual market reports and The Trade Agreement Comparison Guide

dairyaustralia.com.au/manufacturing-resources-and-support/international-trade/dairy-tariffs

Farm and cow numbers/General statistics

Dairy farm numbers

Domestic, Reference, Annual, Detail: Low

Data
The Dairy Farm Number database consists of an annual snapshot of number of dairy farms by location.

Source
The Dairy Farm Number database collect data from the State Dairy Authorities and the Dairy Australia Levy Member Register.

Access
The farm summary section on the Dairy Australia website.

dairyaustralia.com.au/en/industry-statistics/cow-and-farms-data

The Australian Dairy Industry In Focus

dairyaustralia.com.au/industry-statistics/industry-reports/australian-dairy-industry-in-focus

Cull cows

Domestic, Herd, Weekly, Detail: Medium

Data
The Dairy Australia livestock database includes weekly livestock slaughter data (price and head sold) for eight livestock categories from 2003 for Victoria and 2018 onwards for other states. Note that no data is available for Tasmania.

Source
The livestock database uses data provided by Meat and Livestock Australia.

Access
Production Inputs Monitor

dairyaustralia.com.au/industry-statistics/industry-reports/production-inputs-monitor

Who makes what

Domestic, Manufacturing, Quarterly, Detail: Medium

Data
The Dairy Australia Who Makes What database contains manufactured dairy categories, brand and product information, as well as contact details for over 230 current dairy manufacturers in Australia.

Source
The Who Makes What database is populated using publicly available data from Australian manufacturers websites and often complemented with details obtained by contacting the manufacturer.

Access
The who makes what database is available on the Dairy Australia website where you can filter out the specific information in which you are interested.

dairyaustralia.com.au/en/manufacturing-resources-and-support/who-makes-what

International trade/Tariff information

Exchange rates

International, Reference, Daily, Categorised, Detail: Low

Data
The Dairy Australia exchange rate database contains daily exchange rates for AUD, EUR, USD and GBP to about fifty other currencies from 2018 onwards. A limited number of currencies include more historical data.

Source
The exchange rate database uses data from a number of different data sources including but not limited to XE Money and the Reserve Bank of Australia.

Access
Dairy Australia does not provide a standardised report for exchange rates, but this data can be used as reference information in other reports. Please contact the Industry Data Group for more information.

Farm and cow numbers/General statistics

Environmental data

Domestic, Environmental, Detail: Medium

Data
The Industry Data Group's environmental dataset contains water prices for selected locations, dam levels for selected sites in Australia, rainfall and thermal heat index data for Australian dairy farm locations.

Source
The environmental data is based on publicly available data from the Victorian Water Register and Murray Irrigation.

Access
Dairy Australia does not provide a standardised report for environmental data, but customised reports can be made available on request. Please contact the Industry Data Group for more information.

Requesting data and reports

Most of the existing reports can be downloaded from the Dairy Australia website dairyaustralia.com.au. Additional reports or more granular data might be available on request. Custom data extracts can be requested from the Industry Data Group. Some of the data and reports are only available to organisations who participate in the Dairy Australia data sharing program.

CONTACT INFORMATION

For the most efficient response to specific requests, please email our service desk directly **idg.support@dairyaustralia.com.au**

If you have any questions or want to discuss your request before submitting, please contact Chris Anttila **chris.anttila@dairyaustralia.com.au** or +61 3 9694 3757.
