

Market brief

Japan

Financial year 2022/23

Global exports to Japan

Rank #8 in the global dairy market (by volume)

Destination for close to 507,000 tonnes of dairy products, worth US\$2,363 million (in 2022/23).

Exports to Japan have decreased by 13% over five years (2018/19 – 2022/23).

The biggest volume growth (product categories exceeding US\$20 million) has been in:

- Protein (64%), Lactose (21%), Ice Cream (12%), Casein (11%)

The biggest volume decline (products categories exceeding US\$20 million) has been in:

- WMP (-42%), Butter (-33%), Cheese (-17%)

Australian market share

Rank at #4 in the share of Japanese import volume.

Destination for over 58,000 tonnes of Australian dairy products, worth almost US\$295 million (in 2022/23).

Exports to Japan have decreased by 40% over five years (2018/19 – 2022/23).

In 2022/23, there was no export volume growth across all categories.

The biggest volume decline (product categories exceeding US\$1 Million) has been in: SMP (-92%), Condensed Milk (-42%), Cheese (-37%)

Japan is also a signatory to the regional Comprehensive and Progressive Trans-Pacific Partnership (CPTPP) free trade agreement. The establishment of bilateral trade agreements between Japan, the EU, and US, have improved market access for dairy production into Japan for these major dairy exporters.

With the scheduled review of JAEPA now overdue, (after an initial deadline of 2021), Dairy Australia is working with industry partners and the Australian Government to ensure the review progresses and aims to provide market access improvements for Australian dairy into Japan. According to the agreement, tariff step down began in January 2015, however, many dairy products will remain subject to mixed tariffs and rate quotas. A summary of current tariffs for the major dairy categories imported by Japan can be found in Table 2.

Key international marketing programs and initiatives

Dairy Australia is involved in a number of marketing programs and promotion activities in Japan. The annual Scholarship program has trained over 300 industry representatives from the Japanese dairy and trading companies since 1998. All delegates to the Scholarship program are now Dairy Australia's alumni and Dairy Australia keep regular communication with the alumni through newsletters, industry visits/meetings and catch-up dinners in market. Outside of COVID-19 travel restrictions, Dairy Australia also visits the market regularly and holds seminars in Japan to keep the Japanese industry updated on the Australian dairy industry.

Tariff environment

Japan's dairy industry remains heavily protected, with a complex network of laws and quotas controlling domestic production and importation. In January 2015, the Japan-Australia Economic Partnership Agreement (JAEPA) entered into force, allowing Australia a reduction in tariffs and additional country specific quotas for selected dairy products.
